PROJECTS

Kisan Setu- [React, Nodejs, MongoDb]
A Platform for Farmer-
- Built a scalable platform connecting farmers with buyers.
- Worked in a team to build *Kisan Setu*, a platform connecting farmers with buyers. My role involved developing the complete frontend in React and backend in Node.js, integrating MongoDB for efficient data storage and retrieval.

Pizza Sales Analysis – [SQL, Power BI, Excel]
A Platform for Lawer-
- Independently developed a Pizza Sales Analysis project using SQL, Power BI, and Excel. Designed and executed SQL queries to structured datasets, and built interactive Power BI dashboards to visualize sales trends by date, product size, and category for actionable insights.
